

# 5<sup>th</sup> Probability Summer School

July 6 – 17, 2009 at Cornell

*Three main lecturers will each give six 75-minute lectures*

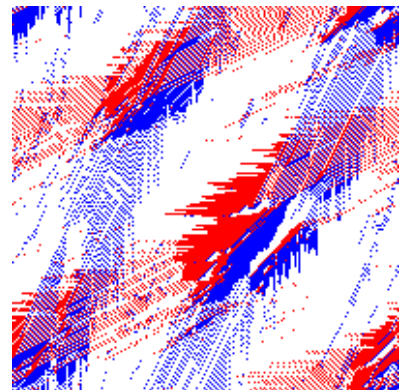

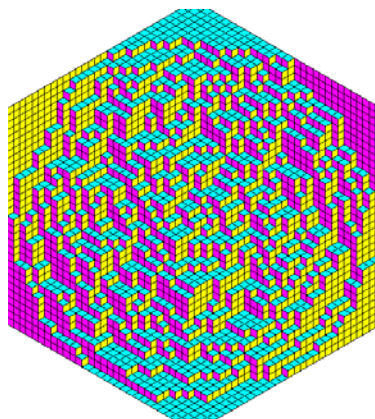

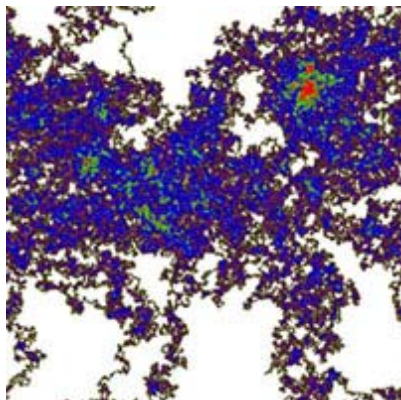

**Ander Holroyd**      *Matching coupling and point processes*

**Robin Pemantle**      *Probability from generating functions*

**Yuval Peres**      *Aspects of Markov chains*

*In addition there will be two lecture series by*

**Rick Kenyon, Scott Sheffield, Balint Virag**

*Individuals who wish to participate should submit the registration form on the conference web page. Funding from an NSF grant is available to support the local expenses of 40-50 advanced graduate students and young researchers, and some travel expenses of participants who are US citizens. This meeting is cosponsored by the Institute of Mathematical Statistics. For more information:*
