

Department of Mathematics
University of Puerto Rico
Río Piedras Campus

The Department of Mathematics announces the opening of three tenure-track positions at the level of Assistant Professor, with a starting date of August 1, 2009. Applicants should have a Ph.D. in mathematics. The Department has an Undergraduate Program and a Graduate Program (M.S. and Ph.D.) with options in the areas of computational mathematics and statistics, pure mathematics (mathematical analysis) and discrete mathematics. Candidates with higher qualifications will be considered as well. We would like to have strong candidates that contribute to one or more of these areas. The candidates are expected to have a strong research record as well as a commitment to teaching graduate and undergraduate courses, and supervise theses. The successful candidates are also expected to actively seek external funding to support their research activities. Conversational knowledge of Spanish is a plus. In any case, it would help the candidate to learn Spanish during the probation period.

Please send the AMS Cover Sheet, curriculum vitae, a letter describing your research projects. Also arrange for the academic transcripts and diplomas, and three letters of recommendation to be sent to the address below. The evaluation of the applications will begin January 1, 2009 and continue until the positions are filled.

The University of Puerto Rico is an Equal Opportunity Employer.

Please send applications or inquiries to:
