

Parque das Nações - Lisboa May 9th - 12th, 2010

StaM2010

The Workshop on Statistical Modelling: Challenges in Health will take place in Vip Executive Art's Hotel, from May 9 to May 12, 2010, in Parque das Nações - Lisbon, and is organized jointly by the Centre of Statistics and Applications, University of Lisbon (CEAUL), and the FCT/MCTES research projects: "Statistical Methods in Genetics and Environment" (PTDC/MAT/64353/2006); "Latent Class Models in Tropical Health" (PTDC/SAU-ESA/81240/2006).

The workshop aims to bring together researchers interested in advanced statistical applications in Health challenging problems, to promote knowledge and experience exchange and also to encourage cooperation between the participants. A fruitful discussion on the role of statistical modelling in Health with maximum participation in non-parallel sessions will include the following areas:

Health spatial problems
Survival analysis
Genetics

Molecular biology
Bioinformatics
Latent Class Models in Health

Invited Speakers

Trevor Bailey (Exeter University, UK), Robin Henderson (Newcastle University, UK),
Marília Sá Carvalho (Fiocruz, Brazil), Richard Boys (Newcastle University, UK),
Sandrine Dudoit (University of California, USA), Carmo Fonseca (University of Lisbon, PT),
Armando Teixeira Pinto (University of Oporto, PT), Luís Filipe Machado (University of
Minho, PT), Ana Margarida Sousa (IGC, PT) Inês Sousa (University of Minho, PT)

Conference Chairperson: Maria Antónia Amaral Turkman

Local Organizing Committee: Lisete Sousa, Valeska Andreozzi,
Luzia Gonçalves, Marília Antunes
CEAUL, University of Lisbon
